

Petition – for filling in Myall Street

Myall Street

Sandhurst

Feb. 13 1874

To the Mayor and Gentlemen of the Council

I beg respectfully to call your attention to the existence of several deep and dangerous holes on the road and footpath in Myall St off Palmerston Street and which holes have been a source of annoyance and serious loss me. As the storm water from Mitchell Street escapes through an unoccupied allotment and rushes across the street into the holes above mentioned from which it runs in torrents under my house seriously injuring the foundation and causing the chimney to settle four inches on one side.

I beg also to state that several of the residents have complained of the said holes as it is quite unsafe for traffic after dark and the traffic is very considerable and the residents numerous. I beg to state that I have at my own expense used one hundred and thirty loads of soil to fill in some of the larger holes. The road and footpath is made and formed to within twenty yards of them and the cost of its continuation and filling in would be under three pounds £3.0.0

Sincerely hoping you will give my application your kind attention and cause the said holes to be filled in and footpath made at your earliest convenience and you will obli[d]ge the residents whos[e] signature are affixed to this petition and your humble servant

Robert Golding
