

Petition – For the formation of Hope Street

To The Worshipful The Mayor and Councillors of the City of Sandhurst

The Petition of the undersigned householders and residents of Hope Street and neighbourhood

Respectfully sheweth,

That the buildings and Inhabitants in that neighbourhood have largely increased during the past year

That Hope Street forms the principal access from the lower portions of the City to Little Barnard and Barkly streets east and other streets (unknown) behind the Asylum and is now in a very dangerous state being obstructed by old Holes at its junction with Barnard Street and higher up with Heaps of mullock excavated when building the Infirmary to the Asylum

That said mullock could be profitably employed at a very small expense in filling up the holes in the lower portion of the street and the vacant allotment belonging to the Council which is also in a very dangerous state being full of holes and unfenced.

That your Petitioners in submitting the above statements to your consideration think that Hope Street has only to be inspected to have what they request immediately attended to

And your petitioners as in duty bound will ever pray
