

## **Petition – for alteration in survey of Booth Street extension**

Booth St., New Chum

12/2/74

To the Councillors of the City of Sandhurst

Gentlemen

We the undersigned residents of Booth Street humbly pray that you will cause the present survey of Booth St. Where your petitioners reside to be shifted further from our dwellings. Your petitioners held their residence areas by Miners Right on Crown Lands before any survey was made and having built their homesteads your Petitioners humbly beg that you will cause an inspection to be made as the line of the present survey comes over three feet through one of your petitioners houses which is built of stone and Grazes the corner of another and if the line of survey is thrown over in the next allotment as in others it will come through the middle of their house. [Their] is ample room farther out for the street without coming so near. Trusting Gentlemen you will give this petition your careful consideration. And your petitioners will ever pray
